

Community Science I

The Community Science Academy is offering a six-week summer enrichment program at the California Institute of Technology (Caltech) in Pasadena. More details at csa.caltech.edu, or via email at csa@caltech.edu.

We start on *Monday, June 19*, and meet every Monday, Wednesday, and Friday (with some exceptions) from 10 am to 3:30 pm. We conclude on July 28. Tuition is \$750, and several need-based scholarships are available.

If you get into CSA 1, you can come back in subsequent summers for CSA 2 and 3. CSA 1 is recommended for high school students, and covers the following topics:

Soil and water quality. Learn how different elements cycle through the biosphere. Measure iron in drinking water, using a colorimeter you build.

Pest control. Learn about fruit flies and ants, and build your own microscope to look at them.

Plant processing. Extract dyes from berries and oils from oranges, and make aspirin from plants.
